

Alcohol Abuse Chart– BA029

Description	<p>◆ The Alcohol Abuse Poster is designed to explain the long-term harmful effects alcohol has on the human body. It provides detailed text and anatomical illustrations to show the damage alcohol can have on vital organs. This poster is a great tool intended to educate people on the effects of alcohol.</p>
Details	<ol style="list-style-type: none"> 1. Dimension: 24" x 36" 2. Material: gloss paper laminated with clear polyester both sides
Image	 <p>The poster, titled "THE HARMFUL EFFECTS OF ALCOHOL", features a central anatomical illustration of a human figure with internal organs highlighted in various colors. Lines connect these organs to descriptive text boxes detailing the harmful effects of alcohol abuse. The text is organized into several sections:</p> <ul style="list-style-type: none"> BRAIN & CENTRAL NERVOUS SYSTEM: <ul style="list-style-type: none"> Impaired judgment, memory, and coordination. Alcohol is a depressant, slowing down the functions of the brain. Long-term use can lead to permanent brain damage, including atrophy and loss of neurons. Alcohol is a neurotoxin, meaning it can damage or destroy nerve cells. Alcohol can lead to a condition called Wernicke-Korsakoff syndrome, which affects memory and the ability to form new memories. OTHER AFFECTS ON CENTRAL NERVOUS SYSTEM: <ul style="list-style-type: none"> Impaired vision and ability to adjust to light. Problems with balance and coordination. Decreased ability to learn from experience. Wounds and injuries that heal slowly. MOUTH: <ul style="list-style-type: none"> Alcohol can lead to gum disease, tooth decay, and oral cancer. THROAT: <ul style="list-style-type: none"> Alcohol can lead to inflammation and swelling of the throat, making it difficult to swallow. HEART: <ul style="list-style-type: none"> Alcohol can lead to heart disease, including coronary artery disease, heart failure, and arrhythmias. Alcohol can also lead to high blood pressure and stroke. MUSCLES: <ul style="list-style-type: none"> Alcohol can lead to muscle weakness and atrophy. STOMACH: <ul style="list-style-type: none"> Alcohol can lead to gastritis, ulcers, and stomach cancer. PANCREAS: <ul style="list-style-type: none"> Alcohol can lead to pancreatitis, a painful inflammation of the pancreas. LIVER: <ul style="list-style-type: none"> Alcohol is a major cause of liver disease, including fatty liver, alcoholic liver disease, and cirrhosis. Alcohol can also lead to liver cancer. REPRODUCTIVE SYSTEM: <ul style="list-style-type: none"> MALES & FEMALES: <ul style="list-style-type: none"> Alcohol can lead to decreased fertility and sexual dysfunction. Alcohol can also lead to complications during pregnancy, including miscarriage, stillbirth, and fetal alcohol spectrum disorders (FASD). PROSTATE & BOWEL: <ul style="list-style-type: none"> Alcohol can lead to an increased risk of prostate cancer and colorectal cancer. SKIN: <ul style="list-style-type: none"> Alcohol can lead to skin problems, including dry skin, acne, and rosacea. GENERAL: <ul style="list-style-type: none"> Alcohol can lead to weight gain and obesity. Alcohol can also lead to malnutrition and vitamin deficiencies.
