

The Pulmonary System Chart – DG046

<p>Description</p>	<ul style="list-style-type: none"> ◆ Laminated Scientific Anatomy Poster Chart ◆ Painstakingly researched and executed by today's top medical illustrators. Up-to-date, with a fresh, consistent style and contemporary look. Full-coverage 1.5 mil lamination with sealed edges • virtually impervious to moisture
<p>Details</p>	<ol style="list-style-type: none"> 1. Dimension: 22" x 28" 2. Material: gloss paper laminated with clear polyester both sides
<p>Image</p>	 <p>The image is a detailed anatomical poster titled "The Pulmonary System". It features a central illustration of the human torso with the heart and lungs highlighted. The heart is shown in cross-section, with four chambers (right and left atria and ventricles) and major blood vessels. The lungs are shown in a realistic pinkish-red color, with a network of bronchi and capillaries. The poster includes several text boxes and smaller diagrams: <ul style="list-style-type: none"> What is the pulmonary system?: A text box explaining the system's role in oxygenating blood. Pulmonary circulation: A diagram showing blood flow between the heart and lungs. Systemic circulation: A diagram showing blood flow between the heart and the rest of the body. Cardiac circulation: A diagram showing the internal flow of blood within the heart. Gas exchange: A diagram of the alveoli in the lungs, showing oxygen entering and carbon dioxide leaving. Blood and gas circulation: A diagram showing the exchange of blood and gases at the cellular level. A legend on the left side of the poster identifies the colors used for different types of blood: blue for deoxygenated blood and red for oxygenated blood. The poster is set against a background of a human silhouette.</p>
